PROJECTS DESCRIPTION

RADAUDIO

JS, C# MVC, .NET API 2, MSSQL
whitenoiz.azurewebsites.net

RadAudio is an online audio distribution platform functioning like SoundCloud. It is available as a demo version. Users can upload, download, stream, like, comment on music and follow their favorite artists. It is built with JavaScript, MVC 4, HTML and Git as the VCS and PayFast for subscription upgrades.

ANANSI

Ionic 2 (Angular 2, HTML + SCSS)
available on Play Store

Anansi The Spider is hybrid (Android + iOS) mobile game which works like a sudoku. It uses a 3x3 grid system of non-repeatable values which range from 1 - 9. The objective is get a sum of 15 in each row and column. It's built with the Ionic JavaScript framework.

CODEFFEE

WordPress (PHP, MySQL)
code.wiredmartian.com

Codeffe is a tutorial blog which I use to write and/or document simple code snippets such as for deploying on the server or solving a persistent error. I designed the Codeffe in 2017 when I was doing Btech to help 3rd year DUT students with their software development projects.

KAZARD

WordPress & WooCommerce
www.kazard.com

Kazard is an urban clothing line founded in Cape Town in 2015 by Ayanda Tonise. The online store facilitates browsing catalogue, managing cart and online payments. The store uses an open source PHP plugin, WooCommerce which works seamlessly with WordPress.

TICKET SYSTEM

.NET MVC 4, MSSQL
izingcweti.azurewebsites.net

A helpdesk (ticket) and asset management system that we (6 developers) built for an IT consulted company (Izingcweti) based in Durban as part of our final year project. I worked on the project at the backend. Credentials for demo: Username (helpdesk@admin.net or assets@admin.net) Password: 123456

SMARTOPERATION

WordPress
www.smartoperation.co.za

SmartOperation Eastern Cape is a division of Kasi Talent Agency which is a youth organisation focused on empowering the youth of Port St Johns (E.C). The first the site using Node + Express, hosted it on Heroku. But a blog engine was need and I migrated it to WordPress.

WIREDMARTIAN

JQuery, HTML + CSS
www.wiredmartian.com

The "WiredMartian" is my online full profile which I built using basic HTML, CSS and JQuery. It contains my dev works and graphics design work. It also has a blog for my artwroks, logos and posters. blog.wiredmartian.com
